

High Vision

We envision a sweeter, more intimate world where-

1. Bees are healthy and abundant
2. Beekeepers and their families make a fair and prosperous living from sustainable farming
3. Consumers are active, educated participants of this sustainable business-model

Values

Health Health is created each day by what we choose to put in our bodies. Raw honey is the embodiment of health.

Integrity We treat our co-workers, partners, bees, and the ecosystem as we want to be treated.

Balance The success of our business and the quality of our lives depend on ecological awareness and preservation.

Family Our honeys are made with LOVE! We are a family-based business. Our family includes our bees, the environment where we farm, and each and every one of our customers.
